Juan de Dios Pérez
PhD in Physiotherapy

"BIOSphere is an indispensable device in my body remodeling treatments. Its focused dermal-functional massage system allows me to work at greater power and depth than conventional manual treatment. That means an increase in the quality of the results."

All the remodeling power at your fingertips

Novasonix presents its new BIOsphere model, the most exclusive and efficient equipment for 100% natural body reshaping treatments based on spherical technology.

The BIOsphere platform has been developed based on the latest natural technology with the aim of offering pleasant, effective and skin-friendly treatments. Through its innovative Slaag Motion handpiece, it performs a dermal-functional massage focused on microcirculation, adipose panniculus and superficial musculature of the target tissue to remodel, tone and relax the musculature.

Ergonomic design for maximum comfort

Slaag Motion has been designed with the professional in mind.

Fast and lasting results

The effectiveness of BIOSphere technology allows obtaining visible results from the first visible results from the 1st session.

The ROI is perceived within a short term after starting treatments.

Three levels of action

The mechanical action generated by the Slaag Motion handpiece acts on three levels of tissue to ensure maximum effectiveness in each application.

Dermis

Activates microcirculation, providing greater oxygenation and nutrients to the tissue to stimulate local metabolism.

Panniculus adiposus

This stimulation activates lipolytic metabolism and makes the adipose panniculus more flexible, facilitating body remodeling.

Superficial musculature

By treating the superficial muscle tissue, it produces analgesic effects, relaxation, and toning.

TECHNICAL SPECIFICATIONS

General	Device power supply:	100-240 V
	Interface type:	10,1" touch screen color display
SLAAG MOTION	Number of spheres:	45
	Rotation speed:	10 – 400 RPM

BIOsphere Benefits

One hand:

The ergonomics of the Slaag Motion handpiece allows the professional to work with only one hand, thus improving the results and the client's sensations.

Safe and reliable:

Speed and depth of work controlled to prevent the appearance of capillary breaks and hematomas.

Pleasant and 100% natural:

The mechanical action produced by the device is painless and can even make it possible to use it for relaxation treatment.

Customizable treatment protocols:

It allows adapting the parameters according to the needs and objectives of the treatment.

Movement combination:

Working maneuvers developed to improve the client's mechanosensitivity, allowing more pressure without causing pain or rejection of the treatment.

Fast and lasting results:

The effectiveness of BIOsphere technology makes it possible to obtain visible results from the 1st session.

High profitability:

The size of the handpiece allows to embrace more surface to obtain fast and efficient results in less time, thus optimizing the work.

Active Cosmetics Beauty Rituals

Exclusively developed to augment the effects of the BIOsphere treatment.

Natural Balance

Natural, effective, versatile and, safe oils, with a high level of therapeutic response. Its vegan ingredients treat the skin from the inside favoring a perfect combination between technology and product.

Tea Loves

Tea Loves is a new line of 4 blends inspired by Novasonix technology. Its ingredients of biological origin have been specially selected to work in synergy with appliances to maximize results in the salon.

About NOVASONIX

Novasonix has been placing technology at beauty's service for more than 10 years, developing unique solutions for the medical-aesthetic sector.

From our headquarters in Granollers (Barcelona), we create, develop and distribute equipment with cutting-edge, non-invasive and, safe technologies to satisfy the most demanding beauty professionals and their customers. Proof of this is the constant investment in R+D+i, the inexhaustible desire to innovate and, the creation of our own patents such as the NSX method.

Our trajectory manufacturing medical-aesthetic equipment has led us to be present in more than 20 countries, basing our development on trust, results and, professionalism, backed by the highest European quality and manufacturing certifications.

We grow alongside our customers, so we offer a universe of services within their reach: from an extensive educational program that allows professionals to work with confidence and security to marketing tools to strengthen the path to success and make the equipment profitable from the first treatments.
