

novapress

Much +
than a pressotherapy

Compact, versatile and upgradeable

Visible results from the 1st session

Where beauty
meets technology

novasonix

NOVA press

Pressotherapy, reduction and reaffirmation

NOVApres acts through an ascending massage that stimulates the blood system, thus increasing the supply of oxygen to the tissues to facilitate the elimination of liquids and toxins from the body that generate cellulite, edema, and venous disorders such as varicose veins.

NOVApres is an indispensable ally for any body treatment either individually or as a complement to other treatments.

NOVApres features intuitive, upgradeable and easy-to-use software with multiple preset treatment programs adjustable to the treatment objectives to optimize the desired results.

NOVApres programs allow you to pause and resume treatment at the same point and skip or cancel cameras during treatment.

novasonix

NOVApress programs maximum versatility

5 preset programs for the pants
3 preset programs for jacket

- Superficial Circulatory
- Deep circulatory
- Anti-edema
- Pregnant
- Sports

Unique garments

✦ Comfort and quality, a guarantee of success

The materials that make up both the pants and the jacket have been specially selected for their resistant, waterproof and easy-to-clean properties.

The uniform distribution of its 24 chambers in fish scale format guarantees that the pressure exerted is distributed homogeneously throughout the treatment area, avoiding areas of positive pressure loss and ensuring maximum efficiency.

- ✓ 24 independent cameras
- ✓ Fish scale format
- ✓ Easy to clean
- ✓ 100% adaptable

novasonix

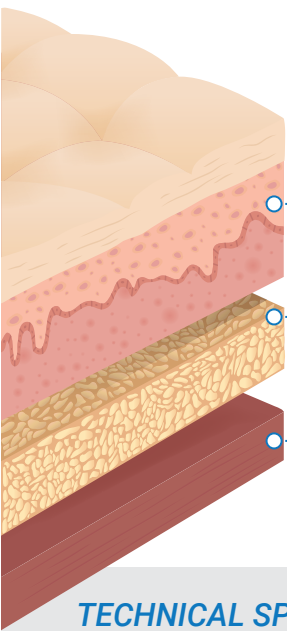

High profitability

The ROI is perceived within a short term after starting treatments

Three levels of action

Each NOVApress garment is composed of 24 individual air chambers that overlap to apply pressure on the tissue of the legs, abdomen, thighs, buttocks, and upper trunk to simultaneously stimulate the epidermis, adipose tissue, and musculature.

Epidermis

Promotes microcirculation by increasing the supply of oxygen to the tissues.

Panniculus adiposus

Promotes the mobilization of fatty deposits in the body favoring a reducing effect.

Musculature

Tones and firms muscle fibers while producing analgesic and relaxing effects.

TECHNICAL SPECIFICATIONS

General	Power supply voltage:	120 - 230 V a.c. 50/60 Hz
	Max. consumption:	180VA (0,75 A - 230V a.c.)
	Screen:	10,1" touch screen capacitive
	Smart system:	Controls the number of active chambers
	Max. pressure:	140 mm Hg. No. of chambers: 24
	Treatment time:	0 - 60 min. Holding time: 2 - 4 - 6 seg.
	Time off:	4 - 6 - 8 seg.
	Ranking:	Class I type BF.
	Protective fuses:	2 x T1,5A / - 250 VAC.
	Pre-set programs:	6 in the pants program and 5 in the jacket program
	Customizable programs:	Yes
	Autonomous treatments:	Yes

NOVApress

Benefits

High versatility:

On the same platform, lower and upper trunk work.
