

ONIX TECHNOLOGY

Intuitive display and user-friendly software for improved device usability

Onix Regen 4.4 includes various individual, combined and free programmes, giving high customisation of the treatments offered:

- **19** specific programmes
- **4** free programmes
- Options to **combine** them

Own SMART TIME system

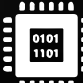

This function provides intermittent emission of adjustable energy.

The **SMART TIME** system makes it possible to work on more sensitive skin, even at high powers, with comfortable and safe treatment application.

 **10.1"** high dimension TFT screen

 with touch system
Touch screen capacitive

 Own intuitive interface
Embedded Linux

C.38.2.0.01-ES

NOVASONIX, YOUR TRUSTED PARTNER

Novasonix is a Spanish company with a long history in the health, beauty and medicine sector. Our more than 10 years of experience in the manufacture of medical-beauty equipment has led us to having a presence in more than 12 countries, basing our growth on trust, results and professionalism.

Our main aim is to offer maximum innovation in technology by constant investment in R&D to develop our own patents, such as the current CBA or NSX method, backed by the most stringent ISO quality certifications.

Our customers are another of the main pillars of our company, and for this reason we have developed the Novasonix Partners plan. This is a universe of services we offer to our customers so they can have everything from marketing services to continuing training.

We manufacture in Spain

High profitability

Technical support

R+D: Our own patented technology

Guaranteed results

MUCH MORE THAN A RADIOFREQUENCY DEVICE

BODY
remodelling

FACIAL
regeneration

LED + RF
448 KHz

Boosts benefits and triples biological effects

novasonix

Much more than a radio frequency device!

ONIX REGEN 4.4 is the revolution in beauty appliances that **enhances the benefits** and **triples the effects** on treated tissue. Combining different types of radio frequency and photobiomodulation technologies that stimulate cell biology to treat and care for the layers of your skin.

Its great versatility allows for a wide variety of treatments, all of them at 448 kHz with results visible from the first session!

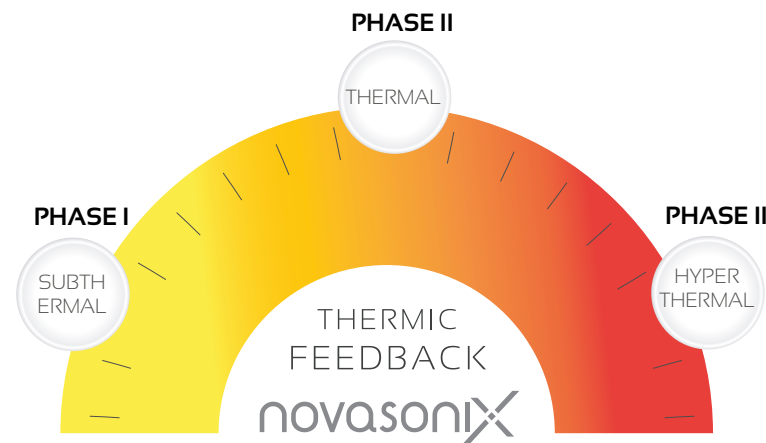

ONIX REGEN 4.4 takes you one step farther, as it brings you cutting edge technology at a very competitive price, making your device profitable in a very short time.

Biological and Thermic Feedback Effects

PHASE I: Subthermal
Activation of cellular function.

PHASE II: Thermia
Acceleration of cellular metabolism (vascularisation, oxygenation, drainage)

PHASE III: Hyperthermia
Acceleration of endogenous regeneration processes: production of collagen and elastin, lipolysis, reduction of fibrosis.

Treatments FACIALS

- Anti-ageing
- Lifting
- Flash
- Sensitive skin
- Bags and dark circles/eye shape
- Neck and double chin

Treatments BODY

- Remodelling
- Anti-sagging/toning
- Anti-cellulite
- Lipolytics
- Breast ptosis

Treatments HAIR

- Hair loss prevention
- Strengthening hair
- Promotes hair growth
- Improves hair aesthetics

LIFTING EFFECT / TISSUE REGENERATION ANTI-AGEING TREATMENTS / BODY REMODELLING

4 Technologies - 4 Heads

*ACTUAL EXAMPLES: original photographs, not digitally altered.

Wrinkles, elasticity, eyelids, neck or neckline.

Chest, sagging, fat, cellulite, fat or stretch marks.

Onix Regen 4.4 technology has numerous scientific studies that support its effectiveness in tissue regeneration, activating natural metabolic reactions due to its profound action on the cell membrane.

Advantages of Onix Regen 4.4

- **A coming together of the two RF448 + LED technologies:** increasing cellular energy and tripling the effects on treated tissue.
- **448 kHz frequency:** Maximum proven effectiveness on skin regeneration and cell proliferation.
- **Constant emission:** Highly precise wave modulation that guarantees the development of natural biological effects on treated tissue.
- **LED photostimulation:** Enhances the work of the RF448 in activating the fibroblasts responsible for the formation of collagen and elastin, helping to maintain the skin.
- **Its 4 technologies** give you great versatility and let you carry out various treatments, expanding your range of services with just one device.
- **Greater profitability:** We offer you the latest technology with the most reliable results, in fewer sessions and at competitive prices.

TECHNICAL FEATURES

- Monopolar output power:** CAP 500VA, RES 200 W
- Bipolar output power:** RES 100 W
- Frequency:** 448 kHz
- Monopolar capacitive electrode:** Ø 20, 40, 60, 80 mm
- Monopolar resistive electrode:** Ø 40,60,80 mm
- Bipolar resistive electrode:** Ø 30 mm
- LED Red light (623 - 730 nm)**
- Power:** 2.7 W
- Wavelength:** Ø 623 mm
