

The Vital O₂ Inhalation
Concentrated oxygen + oxygen-activating negative IONs

Use of the patented technology of **IONised and thus activated oxygen** enables short but effective inhalation times to be achieved.

Inhalation **improves the oxygen supply** of the body through to cell level and has a performance-enhancing and invigoratingly beneficial effect on body and mind.

Along with finishing treatment, vital inhalation with IONised oxygen for instance provides a demonstrably **invigorating physical feeling**.

Areas of application:

- » In addition to finishing treatment or mask
- » Fitness, wellness, anti-ageing and spa
- » Lack of physical and mental energy, feeling generally unwell, sleep disturbance and tiredness
- » Everyday industrial & environmental stresses

An inhalation time of 20-45 minutes, once or twice a week with around 10 administrations is recommended.

Result:

The extra oxygen enhances **physical and mental performance** and can also lead to increased **concentration and memory capacity**.

Furthermore, **blood circulation and energy supply** are increased throughout the body. This means that the body's **immune defence** is stabilised and sustainably boosted.

Win new customers & extend your beauty programme:

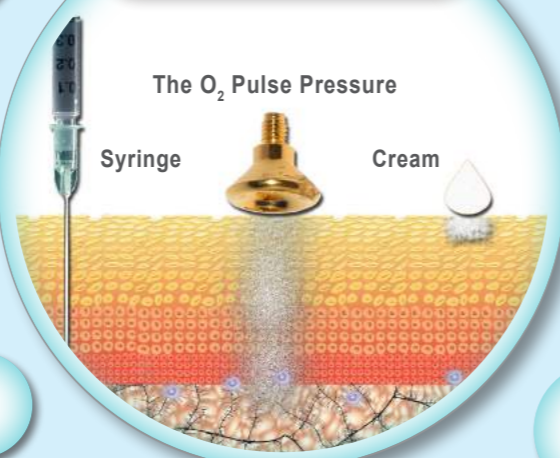

- » Cosmetic treatments that penetrate more deeply
- » Microfine distribution of cosmetics
- » Skin massage & wellness for the face
- » Vitalizing oxygen inhalation with IONs

The multifunctional beauty machine with concentrated oxygen and active IONS

The O₂ Pulse Pressure
Deep skin penetration + concentrated oxygen

Penetration depths

O₂

O₂

O₂

O₂

The patented O₂ Pulse Pressure applicator's computer control enables gentle and consistent oxygen impulses to be used for **demonstrable penetration of the epidermis** - through to the basal membrane.

Active ingredients and cosmetics can be efficiently worked into the skin as required. In addition to the relaxing **skin massage effect**, this means a **deposit within the skin** can be built up, which provides it with a sustainable supply of active ingredients and oxygen.

O₂

O₂

Areas of application:

- » Deeply penetrating wrinkle treatment
- » General improvement of complexion, e.g. for pale, pallid, tired, sun-damaged skin, as well as smokers' skin
- » For relaxing massage of irritated or stressed skin

Result:

After just a few applications, you can already see the result: naturally **elastic and wrinkle-free skin**. Improved **elasticity of the skin strengthens the connective tissue** and makes the dermal tissue structure more uniform. **Skin circulation** is also optimised through the combination with concentrated oxygen.

The O₂ Brusher
Mikrofine atomisation + concentrated oxygen

O₂

O₂

O₂

O₂

O₂

Through **microfine nebulisation with concentrated oxygen** and continuous jet control, the O₂ Brusher allows **optimum distribution of beauty serums** over the skin surface.

The O₂ Brusher enables contactless application of serums or cosmetics, as required.

Areas of application:

- » Contactless applications of liquid active ingredients or cosmetics
- » Microfine and even distribution
- » For soothing irritated skin after fruit acid peeling & microdermabrasion

Result:

The gentle oxygen spray technology **distributes active ingredients evenly over the skin surface**. The concentrated oxygen also stimulates skin blood circulation and achieves a visibly invigorating **skin moisturising effect**, especially with sensitive skin.
